

Table 7 Overall frequency of *Salmonella spp*

S.N.	<i>Salmonella spp.</i>	Total	Percentage
1	<i>S. typhi</i>	8	30.77
2	<i>S. enteritidis</i>	6	23.10
3	<i>S. pullorum</i>	5	19.23
4	<i>S. dublin</i>	1	3.85
5	<i>S. anatum</i>	1	3.85
6	<i>S. choleraesuis</i>	1	3.85
7	<i>S. typhisuis</i>	1	3.85
8	<i>S. paratyphi</i>	1	3.85
9	<i>S. derby</i>	1	3.85
10	<i>S. gallinarum</i>	1	3.85

Note: These figures showed that prevalence of *S. typhi* were higher in cumulative result also and followed by *S. enteritidis*, and *S. pullorum* having the 30.77, 23.10 and 19.23% prevalence rate respectively. *S. dublin*, *S. anatum*, *S. chleraesuis*, *S. typhisuis* *S. paratyphi* *S. derby* and *S. gallinarum* were showing their presence only
